Index to Volume 17

Abbott, J. E., 441
Abramson, D. I., 191
Acceleration: *see also* Rotation
  chronic, effects on induced nystagmus, 709
  forward
    and negative pressure breathing, effect on pulmonary diffusion, 909
    effect on renal function, 413
    respiratory response, compared with chest compression, 410
  stress, protection by stimulation of reticuloendothelial system, 293
  vertebral column strains from, 405
Acclimatization: *see* Temperature
Acetazolamide, effects
  on alveolar-arterial P_{CO_2} difference, 622
  on respiratory gas exchange during hyperventilation, 6
  on sodium and potassium secretion by stomach, 514
Acid-base balance
  and carbon dioxide transients after hyperventilation, 805
  changes during exercise, 656
  of cerebrospinal fluid, chronic derangements, 993
Acid-base transients, during hyperventilation, 228
Acidosis
  metabolic, caused by primary hypocapnia, 283
  respiratory, cerebrospinal fluid buffering during, 812
Ackerman, E., 535
Acland, J. D., 119
Acquisition: *see* Learning
Adachi, R. R., 669
Adams, T., 317
Adenosine triphosphate, effects on mitochondrial swelling, 979
Adrenal cortex, response to chronic hypoxia, 246
Adrenal gland, responses during work, 669
Adrenaline, effect on ear vessels in cold- and warm-adapted rabbits, 754
Adults: *see* Age
Aerobic work capacity, assessment with use of respiratory quotients, 47
Afferent nerves, somatic activity in reflex regulation of diaphragmatic function, 829
Afonso, S., 706
Age
  adults
    blood and plasma volume in males, 195
    sulfur dioxide exposure, effect on respiratory mechanics in males, 252
  and environmental temperature, effect on responses to exercise, 645
  children, lung volume, total and subdivisions, 601
  effects on mitochondrial swelling, 979
  infants, sleep, nature of, 543
  young women: *see* Women
Agnew, W. F., 848
Agostoni, E., 215, 427
Air, breathing: *see* Breathing
Airway, Airflow: *see* Respiratory system
Albumin, serum, effect of infusion on lipid mobilization, 974
Alexander, S. C., 899
Alkalosis, metabolic, respiration during, 33
Altitude: *see also* Pressure, atmospheric
  effect on heart and breathing rates, 467
  high
    adaptation to, effect on myoglobin content and enzymatic activity of muscle, 301
    effect on respiration and phosphorylation in liver and heart mitochondria, 535
    lung diffusing capacity for carbon monoxide, 421
    oxygen saturation, arterial, during exercise, 617
    polycythemia at, value of iron stores in limiting, 243
    radiant temperature of zenith at, 558
Alveolar processes: *see* Lungs
Alwood, M. J., 71
Ambience: *see* Pressure, atmospheric; Altitude
Amdur, M. O., 252
Analyzers: *see* Apparatus
Andersen, K. L., 953
Anderson, N. M., 487, 933
Anderson, W. E., 283
Anesthesia
  inspiration-augmenting reflex, 683
  subcutaneous, muscle and body temperatures during, 306
Angelakos, E. T., 1023
Anthony, A., 535
Aorta, blood velocity
  computed, compared with electromagnetic flowmeter, 482
  measurement by pressure gradient, errors in, 1013
Apnea, during underwater diving: *see* Underwater swimming, diving
Apparatus
  air-thermostated chamber, with proportional temperature control for tissue culture use, 356
  analyzer, electrical, for carbon dioxide in respiratory gases, 126
  bubble method micromodification, for determining blood gas tensions, 743
  cage for restraining rats, 1020
  caliper, electrical, for continuous measurement of relative displacement, 131
  cardiovascular system model, 156
  electrical balance, for recording small outflow rates, 567
  electrocardiograph, for recording rate of change of QRS potentials, 1023
  electroencephalograph, subminiature radio transmitter for, 721
  electromyography, bipolar electrode for, 849
  electronic device, for applying pairs of unlike stimuli, 570
  ergometer, permitting simultaneous exercise and tilting, 562
  flowmeter
    electromagnetic, aortic blood velocity measurement compared with computed, 482
    implanted systems, mechanical zero reference, 177
    Kolin electromagnetic, evaluation, 372
    practical application (conference sponsored by Cardiovascular Study Section, National Institutes of Health), 378
    volumetric, 142
  for bloodless method of recording pulse pressure, 844
  for collection of cerebrospinal fluid, 848
  for continuous indirect measurement of blood pressure, 845
  for continuous measurement of carbon dioxide production in vitro, 365
  for determining cardiovascular response to exercise, 718
  for determining right-to-left shunt in normal man, 778
  for determining systolic blood pressure, 173
  for drop recording, 746
  for dye-dilution measurement of cardiac output, 163
  for nystagmographic measurement of labyrinthine function, 712
  for producing surface active extracts of lungs, 167
  for recording cardiovascular functions in unrestrained dogs, 152
  for recording cycling of sweat gland activity, 741
  for recording isotonic contractions of smooth muscles, 367
  for reducing distortion produced by catheter sampling systems, 369
  for reducing flow artifact when recording from glass electrodes, 175
  for sleep deprivation, 375
  gas chromatograph: *see* Gas chromatography
  heart, mechanical, proper pressure curve shape in ventricles of, 1025
  hygrometry, for recording sweating rate, 735

Apparatus—*Cont.*
injection, watertight swivel joint, 171
interval recorder, electronic, for measuring peripheral blood flow and heart rate, 169
laboratory timer, 850
meter sensitizer, transistorized, 363
microtonometer, for measurement of tissue gas tension, 359
plethysmograph
effect of closed glottis on pressure oscillations, 574
for respiratory measurements of unanesthetized small animals, 576
temperature compensation for mercury strain gauge, 572
reflection oximeter, intravascular and intracardiac, studies in vivo, 552
transducer, triode-type, bridge circuit for, 569
treadmill, for small animals, 566
volumeter, automatic, for small animals, 150
Arm
blood flow, during muscle contraction and joint position changes, 819
sweat, composition, 99
venous capacity, measurement, 147
Arterial-alveolar processes: *see* Lungs
Arteries
blood pressure, measurement using femoral neurovascular loop, 161
oxygen saturation, during exercise at high altitude, 617
pH, threshold pCO_2 dependence on, 866
pressure, effect on intestinal vascular resistance, 503
Arteriosclerosis, neuromuscular changes during, 837
Arteriovenous oxygen: *see* Oxygen
Arteriovenous reflex, in intestine, evidence for, 509
ASDELL, S. A., 737
Aspiration
of bone marrow, aseptic technique, 1021
of fluid, reflex airway reaction to, 787
Athletes: *see* Physical training
Atmospheric pressure: *see* Pressure, atmospheric
Auditory system: *see also* Ear
response to modulated electromagnetic energy, 689
Augmentation, postsystolic, myocardial, 61
AWWAD, H. K., 677

BABCOCK, S. A., 874
BAILIE, M. D., 656
BAKER, R. D., 1020
BALKE, B., 456
BANERJEE, S., 971
BARNES, W. C., 367
BARTLETT, M., 815
BASMAJIAN, J. V., 849
BASS, D. E., 947
BASSINGTHWAIGHTE, J. B., 91
BATES, D. V., 579
BATES, G. D., 743
BECKLAKE, M. R., 579
Behavior: *see also* Learning
after painful electric shock, 333
BELDING, H. S., 103
BELL, J. W., 369
BENJAMIN, F. B., 844
BERENGO, A., 724
BERNARD, B., 1
BERNSTEIN, L., 126
BERNSTEIN, W. H., 479
BICHER, H. I., 173
BIRKHEAD, N. C., 47, 763
BISHOP, J. M., 21
BLAIR, M. R., 326
BLANKENHORN, D. H., 54
Blockade, vagal, effect on respiratory and circulatory functions in hypothermia, 833
Blood: *see also* specific anatomical location
circulation: *see* Circulation, Circulatory system
constituents: *see* specific constituent
flow
artifact reduction when recording from glass electrodes, 175
effect of altering limb position, 191
peripheral, as an indicator of emotional reaction, 67
peripheral, electronic interval recorder, 169
flowmeter: *see* Apparatus
gases: *see* Gases, or specific gas
hematological changes, in long-term perfusion, 531
hemodynamics
during epinephrine infusion, 71
responses to oxygen breathing, 75
perfusion: *see* Perfusion
pressure
continuous indirect measurement, method for, 845
effects of apneic underwater diving, 938
systolic, method for determination of, 173
pressure-flow, regulation by kidney, 201
pressure gradient technique, evaluation, 372
shunt, right-to-left, determination by use of tritium and krypton-85, 778
temperatures, intravascular and intracardiac, 706
volume, in adult males, 195
Blood cells: *see* type of cell or anatomical location
Blood vessels: *see also* name or type of vessel, or specific anatomical location
blood temperature, 706
disease, peripheral, effect on nerve conduction velocity and refractory period, 837
displacement, electrical caliper for measurement, 131
in vivo studies with reflection oximeter, 552
BLYTH, C. S., 967
Body
fat: *see* Fat
lower, venous blood perfusion, reduction of cardiac work during, 54
mass, lean, and total red cell volume, relationship, 737
motion, passively induced, in stimulation of ventilation in emphysema, 771
position
effects on dead space and carbon dioxide gradients, 417
effect on gas distribution in lungs, 38
effect on lung volume and ventilation, 783
erect, lung gas exchange in, regional differences, 893
head-stand, metabolic cost, 117
tilting, and simultaneous exercise, recording ergometer for, 562
size, effect on carbon dioxide diffusion, 649
temperature: *see* Temperature, body
vibration
and heat exposure, effects, 759
vertical, effect on respiration, 913
weight, effect on energy expenditure, 433
BOGDONOFF, M. D., 974
BOLDRIDGE, F., 562
BONDURANT, S., 167
Bone marrow aspiration, aseptic technique, 1021
BONFILS, S., 299
BOSMA, J. F., 209
BOUHUYS, A., 38
Brain
electroencephalograph, subminiature radio transmitter for, 721
epileptogenic effects of pure metals implanted in motor cortex, 697
oxygenation and blood pCO_2, at reduced ambient pressure, 899
BRANDI, G., 51
BRATTON, R., 943
Breast, myoepithelium, effect of oxytocin, 539
Breath holding
alveolar CO_2 during, 874
at beginning of exercise, 221
effects of exercise and oxygen, 225
effects on cardiac rhythm, 461
Breathing: *see also* Respiration
during exercise, mechanical work in trained and untrained subjects, 43
frequency, effect on inspiratory resistance in emphysema, 605
mechanics, and stimulus, relationships at different lung volumes, 917
negative pressure, and forward acceleration, effect on pulmonary diffusion, 909
of air, and postural variations, effects on dead space and carbon dioxide gradients, 417
of oxygen: *see* Oxygen
panting, mechanical aspects, 249
positive pressure, diaphragm activity and thoracoabdominal mechanics during, 215
rate, effect of altitude, 467
BREDELL, G. A. G., 625
BRINSFIELD, D. E., 531
BRISCOE, W. A., 552
Bromsulphalein test, for liver function, 123
Bronchi
constriction, mechanism during inhalation of dust, 613
dimensions, effect of lung inflation, 596
BRUCHI, M., 724

Bubble method, micromodification for determination of blood gas tensions, 743
Bullard, R. W., 735
Burns: *see* Pain, thermal
Burrows, B., 885
Burt, J. J., 967
Butler, J., 701

Cages: *see* Apparatus
Cain, S. M., 263, 622
Calcium, urinary excretion, 525
Caldwell, E. J., 783
Calipers: *see* Apparatus
Caloric restriction, and cold exposure, effect on heat exchange, 947
Canfield, R. E., 268
Capillaries, pulmonary: *see* Lungs
Carbon-11, as carbon dioxide label: *see* Carbon dioxide
Carbon dioxide
alveolar, during breath holding and exercise, 874
and acid-base transients, after hyperventilation, 805
and hyperventilation, effect on cardiac output, 933
gradients, effects of postural variations, 417
in respiratory gases, electrical analyzer, 126
labeled with oxygen-15 and carbon-11, uptake in lung, comparison, 9
production, apparatus for continuous measurement in vitro, 365
pulmonary diffusion, effect of exercise and body and lung size in athletes and nonathletes, 649
tension
alveolar-arterial difference, effects of acetazolamide and fat emulsion, 622
blood, and brain oxygenation at reduced ambient pressure, 899
threshold, dependence on arterial pH for respiratory system, 866
tissue, estimation with subcutaneous gas pockets, 851
transients, during hyperventilation, 228
Carbon monoxide, pulmonary diffusion: *see* Lungs, diffusing capacity
Cardiac diseases, processes: *see* Heart
Cardiovascular system
functions, continuous recording in unrestrained dogs, 152
model for teaching, 156
responses
to exercise, techniques for determining, 718
to smoking, effect of reserpine, 471
Carlson, L. D., 436, 754
Carter, E. T., 228, 805
Carton, R. W., 547
Cassin, S., 150
Castillo, C. A., 706
Catheter sampling systems, method for reducing distortion produced by, 369
Catheterization, cardiac: *see* Heart
Cavagna, G., 51
Cells: *see* type of cell or anatomical location
Cerebrospinal fluid
acid-base components, chronic derangements, 993
buffering, during acute respiratory acidosis, 812
collection, apparatus for, 848
Channin, E., 605
Chest compression
effects on reflex ventilatory drive and pulmonary function, 701
respiratory response, comparison with forward acceleration, 410
Children: *see* Age
Chinard, F. P., 179
Chowdhury, S. R., 943
Chromatography: *see* Gas chromatography
Chromium-51, in determination of relationship between total red cell volume and lean body mass, 737
Chusid, J. G., 697
Cigarette smoking: *see* Smoking
Circulation
effect of vagal blockade in hypothermia, 833
in heart muscle, study with Na^{24} clearance method, 475
reactions to work in heat, 625
Circulatory system, adjustment of, in pearl divers, 184
Clancy, J., 67

AMERICAN PHYSIOLOGICAL SOCIETY 9650 Wisconsin Avenue, Washington 14, D. C.

Contents of Volume 17

No. 1. JANUARY 1962

Continuous measurement of alveolo-arterial gradients at ambient and anoxic levels. *Cosby, R. S., E. C. Stowell, Jr., D. M. Morrison, M. Mayo, F. B. Ruymann, and B. Bernard* 1

Effect of acetozolamide on respiratory gas exchange during hyperventilation in man. *Strömme, J. H., and J. Fog* 6

Uptake of oxygen-15-labeled CO_2 compared with carbon-11-labeled CO_2 in the lung. *West, J. B., and C. T. Dollery* 9

Interpretation of radioactive gas clearance rates in the lung. *West, J. B., R. A. B. Holland, C. T. Dollery, and C. M. E. Matthews* 14

Importance of diffusion and chemical reaction rates in O_2 uptake in the lung. *Staub, N. C., J. M. Bishop, and R. E. Forster* 21

Films from lung washings as a mechanism model for lung injury by ozone. *Mendenhall, R. M., and H. E. Stokinger* 28

Respiration in man during metabolic alkalosis. *Stone, D. J.* 33

Effect of body posture on gas distribution in the lungs. *Bouhuys, A., and H. J. van Lennep* 38

Mechanical work of breathing during exercise in trained and untrained subjects. *Milic-Emili, G., J. M. Petit, and R. Deroanne* 43

Use of respiratory quotients in assessment of aerobic work capacity. *Issekutz, B., Jr., N. C. Birkhead, and K. Rodahl* 47

Pulmonary hysteresis. *Cavagna, G., G. Brandi, F. Saibene, and G. Torelli* 51

Reduction of cardiac work during venous blood perfusion of lower body. *Wyman, M. G., M. H. Weil, and D. H. Blankenhorn* 54

Postsystolic myocardial augmentation: physiological considerations and technique. *Watkins, D. H., and E. R. Duchesne* 61

Peripheral blood flow as an indicator of emotional reaction. *Vanderhoof, E., and J. Clancy* 67

Correlation of hemodynamic events during infusion of epinephrine in man. *Allwood, M. J., E. W. Keck, R. J. Marshall, and J. T. Shepherd* 71

Hemodynamic responses to oxygen breathing in man. *Eggers, G. W. N., Jr., H. W. Paley, J. J. Leonard, and J. V. Warren* 75

Estimation of effective renal plasma flow using I^{131}-labeled Hippuran. *Schlegel, J. U., B. G. Smith, and R. M. O'Dell* 80

Limb tourniquet and intramuscular clostridial toxin effects on renal function. *Nickel, J. F., J. A. Gagnon, and L. Levine* 83

Renal diurnal cycle in hydropenic man. *Hulet, W. H., and J. R. Richardson, Jr.* 87

Areas of dye-dilution curves sampled simultaneously from central and peripheral sites. *Bassingthwaighte, J. B., A. W. T. Edwards, and E. H. Wood* 91

Composition of palmar and forearm sweat. *Collins, K. J.* 99

Sweating and body temperatures following abrupt changes in environmental temperature. *Belding, H. S., and B. A. Hertig* 103

Hypothermia below 25 C for one day in the rat. *Connaughton, P. J., and F. J. Lewis* 107

Effect of skin temperature on absolute threshold for electrical current. *Hawkes, G. R.* 110

Effect of body temperature reduction on response acquisition in mice. *Essman, W. B., and F. N. Sudak* 113

Metabolic cost of head-stand posture. *Rao, S.* 117

Reproducibility of a glucose tolerance test. *Acland, J. D., H. Clayton, and B. Mitchell* 119

Assessment of liver function in mice with Bromsulphalein. *Kutob, S. D., and G. L. Plaa* 123

SPECIAL COMMUNICATIONS

An electrical analyzer for carbon dioxide in respiratory gases. *Bernstein, L., and C. Yoshimoto* 126

An electrical caliper for continuous measurement of relative displacement. *Mallos, A. J.* 131

Pulmonary capillary blood flow during cardiac catheterization. *Linderholm, H., P. Kimbel, D. H. Lewis, and A. B. DuBois* 135

A volumetric blood flowmeter. *Leonard, J. H.* 142

Gas chromatography in measuring pulmonary blood flow and diffusing capacity. *Lawson, W. H., Jr., and R. L. Johnson, Jr.* 143

A technique to measure capacity of veins in the arm. *Mackay, I. F. S., and R. L. Walker* 147

An automatic small-animal volumeter. *Cassin, S., and B. Vogh* 150

New techniques for continuous recording of cardiovascular functions in unrestrained dogs. *Olmsted, F.* 152

A model of the cardiovascular system for effective teaching. *Rothe, C. F., and E. E. Selkurt* 156

Pulmonary vascular resistance and duration of perfusion in isolated lung of dog. *Donald, D. E., and D. Ferguson* 159

Femoral neurovascular loop for indirect measurement of arterial pressure in dogs. *Kohari, J.* 161

Apparatus for automatic dye dilution measurement of cardiac output. *Hansen, J. T., and N. Pace* 163

A method for producing surface active extracts of mammalian lungs. *Bondurant, S., and D. A. Miller* 167

An electronic interval recorder for measuring peripheral blood flow and heart rate. *Goldschmidt, H., and P. Lindgren* 169

A watertight swivel joint permitting chronic injection into moving animals. *Epstein, A. N., and P. Teitelbaum* 171

A simple method for determination of systolic blood pressure in frogs. *Bicher, H. I.* 173

Reducing flow artifact when recording from glass electrodes. *Portnoy, H. D., L. M. Thomas, and E. S. Gurdjian* 175

A mechanical zero reference for implanted flowmeter systems. *Greiss, F. C.* 177

No. 2. MARCH 1962

Pulmonary extravascular water volumes from transit time and slope data. *Chinard, F. P., T. Enns, and M. F. Nolan* 179

Circulatory adjustment in pearl divers. *Scholander, P. F., H. T. Hammel, H. LeMessurier, E. Hemmingsen, and W. Garey* 184

Effect of altering limb position on blood flow, O_2 uptake, and skin temperature. *Abramson, D. I., S. Tuck, Jr., A. M. Zayas, and R. E. Mitchell* 181

Blood and plasma volume in adult males. *Yiengst, M. J., and N. W. Shock* 195

Heart sounds of healthy *Macaca mulatta*. *Hamlin, R. L., F. R. Robinson, C. R. Smith, and W. P. Marsland* 199

Characteristics of pressure-flow regulation by the kidney. *Schmid, H. E., Jr., and M. P. Spencer* 201

Mechanical function of the main pulmonary artery. *Patel, D. J., F. M. de Freitas, and A. J. Mallos* 205

Maintenance of the pharyngeal airway. *Shelton, R. L., Jr., and J. F. Bosma* 209

Diaphragm activity and thoracoabdominal mechanics during positive pressure breathing. *Agostoni, E.* 215

Breath holding at beginning of exercise. *Cummings, E. G.* 221

Influences of exercise and O_2 on breathing holding. *Craig, A. B., Jr., L. S. Halstead, G. H. Schmidt, and B. R. Schnier* 225

Carbon dioxide and acid-base transients during hyperventilation. *Tomashefski, J. F., E. T. Carter, and J. A. Lipsky* 228

Effect of O_2 breathing on pulmonary compliance. *Griffo, Z. J., and A. Roos* 233

Effect of mild hypoxia on ventilation during exercise. *Hornbein, T. F., and A. Roos* 239

Evaluation of iron stores as limiting high altitude polycythemia. *Hornbein, T. F.* 243

Adrenal cortical response to chronic hypoxia. *Hornbein, T. F.* 246

Mechanical aspects of panting in dogs. *Crawford, E. C., Jr.* 249

Effects of acute controlled exposure to SO_2 on respiratory mechanics in healthy male adults. *Frank, N. R., M. O. Amdur, J. Worcester, and J. L. Whittenberger* 252

Influence of pressure suit inflation on pulmonary diffusing capacity in man. *Ross, J. C., G. D. Ley, R. F. Coburn, J. L. Eller, and R. E. Forster* 259

Effects of fat emulsion on O_2 transport and alveolar-arterial gas tensions. *Cain, S. M.* 263

Absorption of various inert gases from subcutaneous gas pockets in rats. *Piiper, J., R. E. Canfield, and H. Rahn* 268

Gas composition of pressurized, perfused gas pockets and the fish swim bladder. *Piiper, J., H. T. Humphrey, and H. Rahn* 275

Primary hypocapnia: a cause of metabolic acidosis. *Eichenholz, A., R. O. Mulhausen, W. E. Anderson, and F. M. MacDonald* 283

Loss of functional residual capacity in poliomyelitis. *Faerber, I., P. B. Liebert, and M. Suskind* 289

Acceleration protection by means of stimulation of reticuloendothelial system. *Stiehm, E. R.* 293

Comparison of two iminodibenzil derivatives on restraint-induced ulcers and gastric secretion. *Bonfils, S., M. Dubrasquet, and A. Lambling* 299

Myoglobin content and enzymatic activity of muscle and altitude adaptation. *Reynafarje, B.* 301

Subcutaneous, muscle, and body temperatures in anesthetized man. *Smith, N. T.* 306

Thermal influence of sunshine and clothing on men walking in humid heat. *Craig, F. N., and E. G. Cummings* 311

Effect of chronic local cold exposure on finger temperature responses. *Adams, T., and R. E. Smith* 317

Effect of salicylates on elevation of body temperature during exercise. *Downey, J. A., and R. C. Darling* 323

Physical regulation of temperature in Eskimos. *Rennie, D. W., B. G. Covino, M. R. Blair, and K. Rodahl* 326

Behavioral consequence of painful electric shock. *Dinnerstein, A. J., and M. Lowenthal* 333

Measurement of the thermal pain threshold of the hard palate. *Margarida, R., J. D. Hardy, and H. T. Hammel* 338

SPECIAL COMMUNICATIONS

A principle for counting tissue structures on random sections. *Weibel, E. R., and D. M. Gomez* 343

A mathematical model of heart rate control by sympathetic and vagus efferent information. *Warner, H. R., and A. Cox* 349

Air-thermostated chamber with proportional temperature control for tissue culture application. *Gordy, E., G. E. Moore, and G. Sieber* 356

Tissue gas tensions by microtonometry; results in liver and fat. *Van Liew, H. D.* 359

A simple transistorized meter sensitizer. *Clason, W. P. C.* 363

A method for direct, continuous measurement of CO_2 production in vitro. *Karler, R., and D. M. Woodbury* 365

Instrument for recording isotonic contractions of smooth muscles. *Erdös, E. G., V. Jackman, and W. C. Barnes* 367

A method for reducing the distortion produced by catheter sampling systems. *Parrish, D., G. E. Gibbons, and J. W. Bell* 369

Evaluation of Kolin type electromagnetic flowmeter and the pressure gradient technique. *Greenfield, J. C., Jr., D. J. Patel, A. J. Mallos, and D. K. Fry* 372

An improved method for deprivation of sleep. *Kavanau, J. L.* 375

Practical application of blood flowmeters. *Jochim, K. E.* 378

No. 3. MAY 1962

Relation between morphological and physiological events in lung studied by rapid freezing. *Staub, N. C., and W. F. Storey* 381

Ventilation of terminal air units. *Storey, W. F., and N. C. Staub* 391

Compensatory nystagmus conditioned during adaptation to living in a rotating room. *Guedry, F. E., Jr., and A. Graybiel* 398

Acceleration-induced strains in the intact vertebral column. *Evans, F. G., H. R. Lissner, and L. M. Patrick* 405

Respiratory response to forward acceleration compared with chest compression in dogs. *Zechman, F. W., and J. Taylor* 410

Effect of forward acceleration on renal function. *Watson, J. F., and R. M. Rapp* 413

Postural variations in dead space and CO_2 gradients breathing air and O_2. *Larson, C. P., Jr., and J. W. Severinghaus* 417

Diffusing capacity of the lung for carbon monoxide at high altitude. *West, J. B.* 421

Diaphragm contraction as a limiting factor to maximum expiration. *Agostoni, E., and G. Torri* 427

Alveolar clearance in dogs after inhalation of an iron 59 oxide aerosol. *Gibb, F. R., and P. E. Morrow* 429

Influence of body weight on energy expenditure. *Malhotra, M. S., S. S. Ramaswamy, and S. N. Ray* 433

Postexercise hyperemia in trained and untrained subjects. *Elsner, R. W., and L. D. Carlson* 436

Effect of oxygen inhalation on manual performance in the cold. *MacCanon, D. M., D. D. Eitzman, and J. E. Abbott* 441

Cold vasodilatation and cold acclimatization in the hands of British fish filleters. *Nelms, J. D., and D. J. G. Soper* 444

Local reactions to air cooling in an Eskimo population. *Miller, L. K., and L. Irving* ... 449

Excretion trends in men undergoing deacclimatization to heat. *Hale, H. B., J. P. Ellis, Jr., B. Balke, and R. C. McNee* ... 456

Some effects of breath holding and apneic underwater diving on cardiac rhythm in man. *Olsen, C. R., D. D. Fanestil, and P. F. Scholander* ... 461

Influence of altitude on heart and breathing rates in some Peruvian rodents. *Morrison, P., and R. Elsner* ... 467

Effect of reserpine on cardiovascular response to smoking. *Westfall, T. C., and D. T. Watts* ... 471

Local circulation in heart muscle studied with Na^{24} clearance method. *Salisbury, P. F., C. E. Cross, R. W. Oblath, and P. A. Rieben* ... 475

Ventricular asynchronism in the dog. *Samet, P., W. H. Bernstein, and R. S. Litwak* ... 479

Comparison of computed aortic blood velocity with that of electromagnetic flowmeter. *Jones, W. B., and J. B. Griffin* ... 482

Influence of voluntary hyperventilation on cardiac output. *Donevan, R. E., N. M. Anderson, P. Sekelj, O. Papp, and M. McGregor* ... 487

Relation of geometry to certain aspects of hydrodynamics in larger pulmonary arteries. *Fry, D. L., D. J. Patel, and F. M. de Freitas* ... 492

Evaluation of slope method for measuring pulmonary blood volume in man. *McGuire, L. B., D. S. Dock, J. W. Hyland, D. C. Harrison, F. W. Haynes, and L. Dexter* ... 497

Effect of arterial pressure on arterial and venous resistance of intestine. *Johnson, P. C., and K. M. Hanson* ... 503

Evidence for local arteriovenous reflex in intestine. *Hanson, K. M., and P. C. Johnson* ... 509

Effect of acetazolamide on secretion of sodium and potassium by the human stomach. *Lindner, A. E., N. Cohen, D. A. Dreiling, and H. D. Janowitz* ... 514

Diuresis associated with prolonged water immersion. *Graveline, D. E., and M. M. Jackson* ... 519

Urinary excretion of calcium and strontium 85 in man. *Samachson, J., and H. Spencer-Laszlo* ... 525

Hematological changes in long-term perfusion. *Brinsfield, D. E., M. A. Hopf, R. B. Geering, and P. M. Galletti* ... 531

Respiration and phosphorylation in liver and heart mitochondria from altitude-exposed rats. *Strickland, E. H., E. Ackerman, and A. Anthony* ... 535

Effect of oxytocin on myoepithelium of the breast. *Wiederman, J., and M. L. Stone* ... 539

Nature of sleep in young infants. *Dittrichová, J.* ... 543

Elastic properties of single elastic fibers. *Carton, R. W., J. Dainauskas, and J. W. Clark* ... 547
